multicellular organismal process
response to endogenous stimulus
response to stress
response to oxygen-containing compound
response to organic substance
response to chemical substance
cellular response to chemical stimulus
response to stimulus
signaling
cell communication
cellular response to stimulus
cell surface receptor signaling pathway
signal transduction
organic substance transport
regulation of transport
biological regulation
single-organism cellular process
single-organism process
positive regulation of biological process
positive regulation of gene expression
positive regulation of nucleobase-containing compound metabolic process
positive regulation of macromolecule metabolic process
positive regulation of macromolecule biosynthetic process
positive regulation of nucleobase-containing compound metabolic process
positive regulation of nucleobase-containing compound biosynthetic process
positive regulation of cellular process
positive regulation of cellular metabolic process
anatomical structure morphogenesis
animal organ development
single-multicellular organism process
