

EDITORIAL NOTE

Exchange of Texture Data by E-Mail

At its last meeting, the Texture and Anisotropy Committee of ASM International approved the creation of a world-wide directory of e-mail addresses of research workers with an interest in texture and anisotropy.

Professors John S. Kallend, Illinois Institute of Technology has volunteered to collect and distribute the mailing list.

Individuals or institutions wishing to be included in the directory of texture and anisotropy researchers should send their name, affiliation and full e-mail address to Prof. Kallend by either of the following addresses:

Internet address: **METMKALLEND@MINNA.IIT.EDU**

Bitnet address: **METMKALLEND@IITVAX.BITNET**

John will send periodically the directory by e-mail to all participants.
