

## Recent Publications

A.D. Appleton: Near term engineering applications of high T<sub>c</sub> superconductors. *Cryogenics* **34** (1994), Suppl. ICEC, 31

H. Desportes: Three decades of superconducting magnet development. *Cryogenics* **34** (1994), Suppl. ICEC, 47

I.N. Nechiporenko et al.: Superconducting magnet separator: devices and applications. *Cryogenics* **34** (1994), Suppl. ICEC, 677

J. Cuellar and A. Alvaro: Fluid–solid mass transfer in magnetic filtration. *Separ. Sci. Technol.* **30** (1995), 141

D.F. Cygan and M.J. McNallan: Corrosion of NdFeB permanent magnets in humid environment at temperatures up to 150° C. *J. Magn. Magn. Mater.* **139** (1995), 131

J.B. Salsman and S.P. Holderfield: A technique for measuring the dielectric properties of minerals at microwave heating frequencies using an open–ended coaxial line. *US Bureau of Mines Report of Investigation RI9519* (1994), 19 pp.

H.R. Flores et al.: Motion of ferromagnetic particles in induction transporters. *Canad. Metall. Quart.* **34** (1995), 123

Z. Li and J.H.P. Watson: The effect of the matrix shape on vortex magnetic separation. *Miner. Eng.* **8** (1995), 401

P. Zhang and M. Bogan: Recovery of phosphate from Florida beneficiation slimes. I. Re–identifying the problem. *Miner. Eng.* **8** (1995) 523

J. Svoboda: Vortex magnetic separation: an illusion or reality? *Miner. Eng.* **8** (1995), 571

J.H.P. Watson and Z. Li: Vortex magnetic separation: a highly selective process with high recovery and a high processing rate. *Miner. Eng.* **8** (1995), 574

C.J. Ferron and K.R. Rawling: Recovery of eudialyte from a Greenland ore by magnetic separation. *Prep. Soc. Min. Engrs. AIME*, no. 93–44 (1993),

T.V. Dendyuk et al.: Technology of Ukrainian garnet–bearing raw materials beneficiation. *Obogashch. Rud.*, no. 5–6 (1993), 14 (in Russian)

He Pingbo et al.: Study on vibrating loosening principle of the CQD–1 magnetic separator. *J. Centr. South Inst. Min. Metall. (China)* **25** (1994), 33 (in Chinese)

S. Holtzhausen and P.C. Engelbrecht: Magnetic separation as a means of increasing the treatment rate of a sulphide flotation plant. *Proc. "African Mining '95" Conference, Windhoek, Namibia, 1995, p. 251.* (The Institute of Mining and Metallurgy, London, England)

G. Boebinger et al.: Building world-record magnets. *Sci. Amer.* **272**, No. 6, June 1995, p. 58

S.V. Dudenkov: Waste concentration. *Tsvetn. Met.* (12) (1993), 61

Y. Wang et al.: Influence of interparticle surface forces on the coagulation of weakly magnetic mineral ultrafines in a magnetic field. *Coll. Surf.* **A90** (1994), 117

Yuansheng Yang et al.: Application of steady magnetic field for refining solidification structure and enhancing mechanical properties of 25Cr-20Ni-Fe-C alloy in centrifugal casting. *ISIJ International* **35** (1995), 389

C.A. Baldan et al.: Design and test of a 7 T split-pair magnet for magnetic separation. *IEEE Trans. Magn.* **30** (1994), 1931

E.S. Lapteva et al.: Isolation method improvement of silicon dioxide from serpentinites by ultrasonic treatment and magnetic separation. *Fiz.-Tech. Probl. Razrab. Polez. Iskop.* No. 1, Jan.-Feb. 1994, p. 101

B.I. Kuzin and V.V. Sokolov: Anisotropy of attenuation of ultrasound in a water-based magnetic field. *Radiotech. Elektron.* **40/4** (1994), 689

T. Abrahams: Economics of ceramic magnets. *Amer. Ceram. Soc. Bull.* **73** (1994), 62

B.Yu. Kudryashov et al.: Development and commissioning of operating section protection unit for high intensity magnetic separators. *Chem. Met. Bul. NTI* (6), June 1992, p.20

X.K. Wang: Magnetic susceptibility of buckyballs. *J. Mater. Res.* **9** (1994), 1578

J. Crangle and M. Gibbs: Units and unity in magnetism: a call for consistency. *Physics World*, November 1994, p. 31

V.I. Tyurnikov et al.: On the possibility to use magnetic susceptibility for evaluation of concentration ability of ores. *Tsvet. Metallurg.* No.2, February 1993, p. 36
