RECENT PUBLICATIONS

M. Brozek and W. Pawlos. Visualization of the process of raw material separation in the separator with ferromagnetic liquid, pp. 1494.

G.J. Lyman *et al.* Fundamental prediction of particle separation on a simple sluice, pp. 1638.

Th. Neesse *et al.* Computer-controlled hydrocyclone battery with maximum solids recovery, pp. 1552.

M.S. Brennan *et al.* Towards a new understanding of the cyclone separator, pp. 378.

A. van Shaik *et al.* The role of product design and liberation in the optimization of recycling passenger vehicles, pp. 1768.

E.V. Verhoef *et al.* A dynamic model of metal production and waste management, pp. 1778.

T. Furuyama *et al.* Development of a processing system of shredded automobile residues, pp. 1805.

M.P. Shrivastava *et al.* Recovery of enriched grade iron ore fines from washing plant waste (slime) at Dalli Mines of Bhilai Steel Plant (abstract only).

P.N.M. Das *et al.* Characterisation and processing of Indian ilmenites, pp. 642.

S. Kingman *et al.* Application of high electric fields strength microwave energy for processing ores and minerals, pp. 327.

S. Owada *et al.* Application of electrical disintegration to coal, pp. 623.

V. Avdokhin and I. Kovlekov. Concentration of fine gold from tailings on the magnetic sluice box, pp. 402.
M.C. Zanetti et al. Recycling and reutilization of cast foundry wastes, pp. 1836.
H.R. Manouchehri. Triboelectrical charge characterization and electrical separation of wollastonite from complex silicate ores, pp. 222.
E. Barsky and M. Barsky. Correlation between the velocity of particle spin and particle settling and the optimal stream velocity in gravity separation, pp. 336.
A.D. Shuloyakov et al. Disintegration of rock by electric discharge impulses, poster.
A. Shibayama et al. Fragmentation of ore and solid waste by means of electrical disintegration and disintegration by underwater explosion, poster.
Xiong Dahe. Slon vertical ring and pulsating high gradient magnetic separator applied in China, poster.
A.F. Usov and V.A. Tsukerman. Innovation processes and device for processing of industrial minerals, mica, diamond based electric pulse disintegration: design and testing, poster.
J. Bosman and N. Lourens. The application of cyclones in heavy mineral processing, poster.
M.M. Ng and P. Holtham. Measuring resistivity of titanium minerals in a corona field, poster.
V.V. Karmazin. Usage of correlation between liberation parameters and conditions of separation of minerals for reaching maximal technological efficacy of the mineral processing, poster.

L. Andrew and OP. Mular. Electrical methods of separation, pp. 1049.
D.A. Norrgran and M. J. Mankosa. Selection and sizing of magnetic concentrating equipment, pp. 1069.
B. Arvidson. Photometric ore sorting, pp. 1033.
D.F. Symonds and S. Malbon. Sizing and selection of heavy media equipment, pp. 1011.
A.R. Laplante. The selection and sizing of centrifugal concentration equipment, pp. 995.
P.E. Reeves. Types and characteristics of gravity separation and flowsheets, pp. 962.
R.O. Burt. Types and characteristics of gravity separation and flowsheets, pp. 947.
