

A

B

A) Images corresponding to cardiac section fields containing TUNEL positive nuclei in doxorubicin-treated WT and KO adult hearts (WTD, KOD) (n= 4). Nick DNA was end labeled with biotin-dUTP, revealed with FITC-streptavidin (green) and nuclei were stained with DAPI (blue). Fluorescent microscope images were obtained at 400x. B) Western blot for active caspase 3 protein (17 kD), positive control (Ctrl +) for active caspase 3 correspond to extracts of staurosporin-treated cardiomyocytes in culture.
