EUROPEAN HYBRID MICROELECTRONICS CONFERENCE

The First European Hybrid Microelectronics Conference was held at Bad Homburg, Germany, 2–4 May, 1977. This Conference was organised by The International Society for Hybrid Microelectronics (I.S.H.M.) – Deutschland, but through the auspices of the European Liaison Committee all the other European Chapters of I.S.H.M. were involved.

Electrocomponent Science and Technology is very proud to be able to publish the vast majority of the papers presented at the conference. This issue and the three which follow it will contain the conference papers. In some cases, the papers have been revised by the authors and differ from the original versions read at the meeting.

It is hoped that publication in this manner will give a wide dissemination of the material from the Conference.
