

Supp S8 . xDnmt3a expression pattern during development. Shown is temporal RT-PCR analysis of xDnmt3aL1 during embryonic development from unfertilised egg cells to fully developed tadpoles and the *Xenopus* kidney-derived cell-line A6. Stages shown are: E=egg, bl=blastula, ga=gastrula, ne=neurula, tb=tailbud, td=tadpole, A6=A6 cell-line, -RT=-reverse transcriptase RT-PCR control
