In the article titled “Topography Prediction of Helical Transmembrane Proteins by a New Modification of the Sliding Window Method” [1], the error occurred in formula (1): the summation index i of the function $f_n(k + i)$ was accidentally lost. It should be corrected as follows:

$$f_n(k) = \frac{1}{2n+1} \sum_{i=-n}^n f_{n-1}(k+i), \quad n = 1, 2, \dots, 5, \quad (1)$$

$$f_0(k) = f(k).$$
