

Special Issue on

Biomarkers of Brain Function and Injury: Biological and Clinical Significance

Call for Papers

There is growing evidence that biomarkers will constitute a useful source for further investigations on CNS development, function, and damage. However, several crucial points before their inclusion in clinical guidelines need to be addressed. The solution resides in multidisciplinary cooperation among neonatologists, pediatricians, biochemists, neuroscientists, and last but not least manufacturers.

In the last decades, several novel molecules have been suggested to be reliable biomarkers to predict outcomes in adults, children, neonates, and fetuses. This holds for brain trauma and brain insults, which have been compared with functional/clinical scores or measures of neuropsychological impairment.

According to the main known pathophysiological steps leading to brain bleeding and/or damage, investigations aim at clarifying biomarkers role as predictors of damage and localization and extension of the lesion in adult and pediatric and perinatal periods are eagerly awaited. Potential topics include, but are not limited to:

- Biomarkers in experimental animal model with particular regard to hypoxia reperfusion injury and preconditioning
- Biomarkers of brain damage in relation to standard monitoring techniques (i.e., MRI, EEG, etc.)
- Biomarkers of the localization and extent of the brain lesion (clinical and experimental)
- Biomarkers of CNS functions (clinical and experimental)
- Biomarkers of the effectiveness of therapeutic strategies (clinical and experimental)
- Biomarkers in stroke and tumors
- Biomarkers in neurodegenerative disease

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/bmri/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/bmri/neuroscience/bnbc/> according to the following timetable:

Manuscript Due	Friday, 27 June 2014
First Round of Reviews	Friday, 19 September 2014
Publication Date	Friday, 14 November 2014

Lead Guest Editor

Diego Gazzolo, Neonatal Intensive Care Unit, Department of Pediatrics, C. Arrigo Children's Hospital, Alessandria, Italy; dgazzolo@hotmail.com

Guest Editors

Giovanni Li Volti, Department of Biological Chemistry, Medical Chemistry and Molecular Biology, University of Catania, Catania, Italy; livolti@unict.it

Antonio W. D. Gavilanes, Department of Pediatrics and Neonatology, Maastricht University, LB Maastricht, The Netherlands; danilo.gavilanes@mumc.nl

Giovanni Scapagnini, Department of Health Sciences, University of Molise, Campobasso, Italy; gscapag@gmail.com
