Introducing the sixth edition of the *Canadian Tuberculosis Standards*

Richard Long MD¹, Edward Ellis MD²

The sixth edition of the *Canadian Tuberculosis Standards* will soon be available in hard copy through the offices of the Canadian Lung Association (CLA), and the individual provincial and territorial lung associations, and in PDF format at <www.publichealth.gc.ca/tuberculosis>.

Historically, the *Standards* became important when effective treatment of tuberculosis became available and sanatoria closed. In contrast to the first (1972), second (1981), third (1988) and fourth (1996) editions, which were products of the Canadian Thoracic Society (CTS)/CLA alone, the fifth (2000) and sixth editions of the *Standards* were jointly produced by the CTS/CLA and Health Canada (fifth), and the Public Health Agency of Canada (PHAC) (sixth). The evolution of the *Standards* as a document dependent on the CTS for medical and scientific input, and on the PHAC for public health and policy input, was part of a broader shift from non-governmental to governmental organization of tuberculosis prevention and control activity in Canada.

The Tuberculosis Prevention and Control Program of the PHAC is the sponsor of the Canadian Tuberculosis Committee, a national committee with representation from each province and territory, Citizenship and Immigration Canada, First Nations and Inuit Health Branch of Health Canada, Correctional Service Canada, Canadian Public Health Laboratory Network, Association of Medical Microbiology and Infectious Disease, CLA, CTS and PHAC (both the National Microbiology Laboratory and the Tuberculosis Prevention and Control Program). It also houses the Canadian Tuberculosis Surveillance System and the Canadian Tuberculosis Laboratory Surveillance System, as well as represents Canada internationally. The major role of the Tuberculosis Committee of the CTS is now the preparation of the *Standards*. In fact, the membership of the CTS Tuberculosis Committee and the editorial committee of the *Standards* are one and the same; the editors of the *Standards* are the Chair of the CTS Tuberculosis Committee and the Manager of the Tuberculosis Prevention and Control Program of the PHAC.

The sixth edition of the *Standards* is a substantial revision to its predecessor the fifth edition (see below). Chapters or appendixes already in the fifth edition were redacted, and new chapters and appendixes were added (Chapters 14, 15 and 18; Appendixes D, E, F, G, H and J) after a systematic survey of end-user satisfaction with the fifth edition undertaken by the CTS. In addition to the chapter-specific table of contents and

expanded bibliographies, the text is populated with a series of Web resources that will be regularly updated by PHAC and other agencies. As in the fifth edition, treatment recommendations are rated using a roman numeral (I, II or III), which indicates the quality of evidence supporting the recommendation (1). The *Standards* are meant to be a definitive resource on issues pertaining to tuberculosis prevention and control in Canada. In contrast to provincial and territorial guidelines, which describe how an action is to be accomplished and how the structure of care is framed, the *Canadian Tuberculosis Standards*, like the *International Standards for Tuberculosis Care* (available at <www.nationaltbcenter.edu/international/>), provide the foundation on which care can be based, presenting what should be done.

CANADIAN TUBERCULOSIS STANDARDS, SIXTH EDITION (2007)

Preface

Acknowledgements

Epidemiology

- Chapter 1 Epidemiology of tuberculosis in Canada
*Melissa Phipers, Dennis Kunimoto,
 Marcel Behr, Derek Scholten, Edward Ellis*

Medical aspects of tuberculosis

- Chapter 2 Mycobacteriology laboratory standards:
 Services and policies
*Joyce Wolfe, Kym Antonation,
 Meenu Kaushal Sharma*
- Chapter 3 Transmission and pathogenesis of
 tuberculosis
Richard Long, Kevin Schwartzman
- Chapter 4 Diagnosis of tuberculosis infection and
 disease
Dick Menzies, Kamran Khan

Chapter 5	Nonrespiratory tuberculosis <i>Victoria Cook, Richard Long</i>	Chapter 15	Immigration and tuberculosis control in Canada <i>Brian Gushulak, Sylvie Martin</i>
Chapter 6	Treatment of tuberculosis disease and infection <i>Vernon Hoepfner, Heather Ward, Kevin Elwood</i>	Chapter 16	Tuberculosis control within institutions <i>Dick Menzies, Michael Gardam</i>
Chapter 7	Drug-resistant tuberculosis <i>Richard Long, Monica Avendano, Lori Whitehead</i>	Chapter 17	Bacille Calmette-Guérin (BCG) vaccination in Canada <i>Kevin Elwood, Mark FitzGerald</i>
Chapter 8	Pediatric tuberculosis <i>Ian Kitai, Patricia Malloy, Alice Kowalczyk, Richard Long</i>	International aspects	
Chapter 9	Tuberculosis and human immunodeficiency virus <i>Stan Houston, Paul Brassard, Mark FitzGerald, Wendy Wobeser</i>	Chapter 18	Canada and international tuberculosis control <i>Donald Enarson, Anne Fanning, Edward Ellis</i>
Chapter 10	Nontuberculous mycobacterial disease <i>Robert Cowie, Stephen Field, Anne Fanning</i>	Appendix A	Contributors
Public health aspects of tuberculosis		Appendix B	Canadian Tuberculosis Surveillance System
Chapter 11	The role of public health in tuberculosis control <i>Robert Stirling, Donald Enarson</i>	Appendix C	Definition of terms
Chapter 12	Contact follow-up and outbreak management in tuberculosis control <i>Terry-Nan Tannebaum, Lillian Yuan, Tamara Wallington</i>	Appendix D	Interferon-gamma release assays: Canadian Tuberculosis Committee advisory committee statement
Chapter 13	Surveillance and screening in tuberculosis control <i>Wendy Wobeser, Lillian Yuan, Brian Gushulak, Jerome Bickenback, Elaine Randell</i>	Appendix E	Tuberculosis education and training resources
Chapter 14	Tuberculosis control in First Nations and Inuit populations <i>Pamela Orr, Cheryl Case, Teresa Mersereau, Marcus Lem</i>	Appendix F	BCG vaccine usage in Canada – current and historical
		Appendix G	Recommendations for the screening and prevention of tuberculosis in patients with human immunodeficiency virus (HIV) and the screening for HIV in tuberculosis patients and their contacts
		Appendix H	International standards for tuberculosis care
		Appendix I	Immigration and medical surveillance guidelines
		Appendix J	Ethical and legal considerations for tuberculosis surveillance and screening
