In the article titled “Myopic versus Farsighted Behaviors in a Low-Carbon Supply Chain with Reference Emission Effects” [1], there were some typographical errors in the text as follows:

On page 4, the third paragraph includes the word (manufacture). The correct word is “manufacturer.”

On Page 9, proposition 10 reads “The steady-state products $R^F_{\infty} P^F_{\infty}$ between the farsighted and myopic scenarios are compared.” The superscript should be removed in $R^F_{\infty} P^F_{\infty}$. It should read $(R^F_{\infty} P^F_{\infty})$.

On page 11, the vertical axis label in Figures 6 and 7 reads $R^2 P^2$. It should read $(R^2 P^2)$.

The authors apologize for these errors and clarified that they do not affect the results or the conclusions of the article.
