

358      **Supplemental Table 1. Clinical characteristics of the keloid patients (n=86).**  
359

Variable	Keloid patients n (%)
Family history of keloid (first degree relative)	10 (11.6)
Females	69 (80.2)
Multiple keloid scars	26 (30.2)
<b>Etiology of keloid scars:</b>	
Postoperative complication	47 (54.6)
Posttraumatic complication	9 (10.5)
Burning	9 (10.5)
Piercing ear	5 (5.8)
Vaccination	2 (2.3)
Insect bite	2 (2.3)
Unknown	12 (14.0)
<b>Location of keloid scars:</b>	
Head and neck	28 (26.4)
Chest	23 (21.7)
Back	10 (9.4)
Abdomen	13 (12.3)
Extremities	32 (30.2)
Total *	106 (100.0)

394      \* Due to multilocality of keloid scars in some patients, number of keloid location is  
395      higher than the number of studied subjects.
