

Special Issue on  
**Integrated Medicine in Central Sensitization Disorders**

# CALL FOR PAPERS

Integrated medicine has been widely used as a therapeutic method, as recommended by the world health organization (WHO), for central sensitization disorders such as depression, stroke, pain, epilepsy, addiction, learning memory, migraine, Alzheimer's disease, Parkinson's disease and dementia. These disorders are often difficult to treat because the underlying mechanisms remain unknown. In this special issue, we encourage the submission of clinical studies, basic research, and review articles on the underlying mechanism of integrated medicine for relieving central sensitization disorders.

Potential topics include but are not limited to the following:

- ▶ Basic research of integrated medicine on central sensitization disorders
- ▶ Effect and mechanisms of integrated medicine for central sensitization disorders
- ▶ Clinical trials of integrated medicine on central sensitization disorders
- ▶ Safety and efficacy of integrated medicine for central sensitization disorders
- ▶ Review articles of integrated medicine for central sensitization disorders
- ▶ Integrated medicine in diagnosis of central sensitization disorders

Authors can submit their manuscripts through the Manuscript Tracking System at <https://mts.hindawi.com/submit/journals/ecam/imcs/>.

Papers are published upon acceptance, regardless of the Special Issue publication date.

**Special Issue Editor in Chief**

Ching-Liang Hsieh, China Medical University, Taichung, Taiwan  
*clhsieh@mail.cmuh.org.tw*

**Guest Editors**

Yi-Wen Lin, China Medical University, Taichung, Taiwan  
*yiwenlin@mail.cmu.edu.tw*

Younbyoung Chae, Kyung Hee University, Seoul, Republic of Korea  
*ybchae@khu.ac.kr*

Lixing Lao, Hong Kong University, Pokfulam, Hong Kong  
*lxlao1@hku.hk*

**Submission Deadline**

Friday, 16 February 2018

**Publication Date**

July 2018
