

Special Issue on
**Ethnopharmacological Studies for the Development of
New Drugs 2019**

CALL FOR PAPERS

Ethnopharmacology is an important discipline for the development of new medicines that are of extreme importance for the conservation and enhancement of the traditional use of natural products and undoubtedly is one of the main sources faster for the rational development of new medicines.

There are several examples of drugs that have been discovered from ethnopharmacologic studies. Therefore, in this context, the aim of this special issue is to present important studies carried out by researchers from all the areas that explore and dedicate themselves to the following themes, which can be presented for publication in this journal.

Potential topics include but are not limited to the following:

- ▶ Ethnopharmacy
- ▶ Ethnopharmacology and ethnobotanical studies
- ▶ Ethnomedicine
- ▶ The bioactive compounds from animals and plants
- ▶ Pharmaceutical technology with natural products
- ▶ Clinical application of natural products in different communities
- ▶ Predictions and in silico studies with natural products
- ▶ Alternative biological assay for determination of natural product activity

Authors can submit their manuscripts through the Manuscript Tracking System at <https://mts.hindawi.com/submit/journals/ecam/esdn19/>.

Papers are published upon acceptance, regardless of the Special Issue publication date.
