

Evidence-Based Complementary and Alternative Medicine

Special Issue on **Complementary and Alternative Therapies for Liver Diseases 2014**

CALL FOR PAPERS

Liver disease is a general term for any damage that reduces the functioning of the liver. It indicates any disease or disorder that causes the liver to function improperly or cease functioning. In recent years, complementary and alternative therapies gain popularity worldwide and have been used in a variety of diseases including those of the liver. However, their efficacy, safety, and mechanisms of action remain insufficiently understood and even controversial. Therefore, there is an urgent need for clarifying their efficacy, quality assurance, and reproducibility. Moreover, definite proof of their efficacy in liver diseases is scarce.

We invite authors to contribute original research and review articles that will stimulate the exertion to explore the field of complementary and alternative medicine for liver diseases by basic research, clinical practice, and clinical research to improve the efficacy of these therapies. In this special issue, we particularly take an interest in manuscripts that evaluate and discuss the rationale, methods, preliminary mechanism, clinical practice guideline, or expert consensus for complementary and alternative therapies in liver diseases.

Potential topics include, but are not limited to:

- ▶ Recent developments in complementary and alternative therapies in liver diseases
- ▶ *Ex vivo* and *in vivo* studies related to the treatment of liver diseases by the complementary and alternative therapies
- ▶ Randomized controlled clinical trials with well-selected end points to assess the role of a therapy for liver diseases
- ▶ Prevention of a liver disease by complementary and alternative medicine
- ▶ Curative therapy and prevention of recurrence using antiviral therapy for prevention of postoperative recurrence of liver cancer
- ▶ Combination use of conventional and alternative methods in treatment for liver diseases
- ▶ Clinical trial protocols for alternative treatment of liver diseases
- ▶ Evidence supporting the use of alternative treatment of liver diseases
- ▶ Safety, licensing regulations, and pharmacovigilance regarding alternative treatment of liver diseases
- ▶ Herbs-induced autoimmune-like liver injury
