

## Special Issue on **Advances in Therapeutic Endoscopy**

# CALL FOR PAPERS

Endoscopy has dramatically changed the practice of gastroenterology and indeed medicine in general. Beyond its diagnostic capabilities, gastrointestinal endoscopy is now increasingly embodied by therapeutic and other advanced interventional procedures. This continuous evolution of the spectrum of endoscopy represents an active area of ongoing research and clinical care with tremendous biomedical potential.

To encourage and promote dissemination of recent developments in therapeutic gastrointestinal endoscopy, we invite investigators to contribute original research as well as review manuscripts which examine the current state of the art. In this special issue, manuscripts related to topics pertaining to advances in therapeutic endoscopy will be welcomed.

Potential topics include but are not limited to the following:

- ▶ Pancreatobiliary disease (e.g., ERCP, EUS, and cholangioscopy)
- ▶ Gastrointestinal bleeding/hemostasis
- ▶ Luminal stenting
- ▶ Endoscopic mucosal resection and submucosal dissection
- ▶ Endoscopic ablation therapies (e.g., RFA and PDT)
- ▶ Combined/hybrid endoscopic-surgical techniques

Authors can submit their manuscripts through the Manuscript Tracking System at <https://mts.hindawi.com/submit/journals/grp/ate/>.

Papers are published upon acceptance, regardless of the Special Issue publication date.

### **Lead Guest Editor**

James H. Tabibian, Olive View-UCLA Medical Center, Sylmar, USA  
*jtabibian@dhs.lacounty.gov*

### **Guest Editors**

Sooraj Tejaswi, UC Davis Medical Center, Sacramento, USA  
*stejaswi@ucdavis.edu*

Júlio P. Lima, Universidade Federal de Ciências da Saúde de Porto Alegre, Porto Alegre, Brazil  
*jpereiralima@terra.com.br*

Mohit Girotra, University of Miami Miller School of Medicine, Miami, USA  
*girotra.mohit@gmail.com*

### **Submission Deadline**

Friday, 2 March 2018

### **Publication Date**

July 2018
