Special Issue on

Recent Advances in Differential, Functional Differential, Difference, and Dynamic Equations

CALL FOR PAPERS

This special issue is devoted to the analysis of qualitative behavior of solutions to differential and functional-differential equations, difference equations, and dynamic equations on time scales. It covers asymptotic theory, oscillation theory, stability theory, inequalities theory, and applications in science and technology. The twofold goal of this special issue is to reflect both the state-of-the-art theoretical research and important recent advances in the solution of applied problems.

Potential topics include but are not limited to the following:

- ▶ Asymptotic behavior of solutions
- ▶ Oscillation and nonoscillation of solutions
- ▶ Stability of solutions
- ▶ Differential inequalities, inequalities on time scales, and their applications
- ▶ Applications in medicine, social and life sciences, engineering, and technology

Authors can submit their manuscripts through the Manuscript Tracking System at http://mts.hindawi.com/submit/journals/ijde/radd/.

Papers are published upon acceptance, regardless of the Special Issue publication date.

Lead Guest Editor

Tongxing Li, Linyi University, Linyi, Shandong, China
