

## Special Issue on Acute and Chronic Pancreatic Inflammation

### Call for Papers

Acute and chronic pancreatitis result in considerable morbidity, are increasing in incidence, and have a high mortality. Due to the inaccessibility of the pancreas to study, our understanding of the pathophysiology of pancreatitis remains limited. Our current knowledge of the evolution of pancreatitis can be described as a progression from an initial acinar cell injury to local and systemic inflammatory responses. If resolution fails to occur, infection or chronicity may supervene.

We invite researchers to contribute original research articles and review articles on topics that shed new insights into the inflammatory processes that occur in pancreatitis. These insights may derive from animal models, studies on the human pancreas, measurement of systemic inflammatory markers, clinical studies, and genetic analyses. Potential topics include, but are not limited to:

- Genetic polymorphisms and mutations
- Cytokines and chemokines
- Transcription factors
- The heat shock response
- Autoimmune pancreatitis
- Neuroimmune interactions
- SIRS, sepsis, and MODS in acute pancreatitis

Articles published in this special issue will not be subject to the journal's Article Processing Charges.

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/iji/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/> according to the following timetable:

Manuscript Due	November 25, 2011
First Round of Reviews	February 24, 2012
Publication Date	May 25, 2012

### Lead Guest Editor

**Derek O'Reilly**, Department of Surgery, North Manchester General Hospital, Delaunays Road, Manchester M8 5RB, UK; [doreilly@doctors.org.uk](mailto:doreilly@doctors.org.uk)

### Guest Editors

**Zoltan Rakonczay**, First Department of Medicine, University of Szeged, P.O. Box: 427, 6701 Szeged, Hungary; [raz@in1st.szote.u-szeged.hu](mailto:raz@in1st.szote.u-szeged.hu)

**Marja-Leena Kylänpää**, Second Department of Surgery, Helsinki University Central Hospital, Haartmaninkatu 4, 00290 Helsinki, Finland; [leena.kylanpaa@hus.fi](mailto:leena.kylanpaa@hus.fi)
