CORRIGENDUM

ON SOME EXTENSIONS OF HARDY'S INEQUALITY

CHRISTOPHER O. IMORU

Department of Mathematics
University of Ife
Ile-Ife, Nigeria

There are some misprints in the above paper (which appeared in Vol. 8, No. 1, 1985, pp 165-171). These errors are corrected as follows:

On p. 165, line 5 up: "l-r" should read l-r.

On p. 165, line 4 up: in should read if.

On p. 166, line 10: $\int_0^b$ in (1.2) and $\int_a^\infty$ in (1.3) are replaced by

$\int_a^b$ should read $\int_0^b$ in (1.2) and $\int_a^\infty$ in (1.3) are replaced by $\int_a^b$.

On p. 166, line 3 of Theorem 2.1: The integral signs are omitted.

On p. 167, line 8: $[g(c)=g(d)]$ should read $[g(c),g(d)]$.

On p. 167, line 10: $G(x)$ should read $F(x)$.

On p. 167, line 11: $\sigma,(g(b))$ should read $\sigma(g(b))$.

On p. 167, line 20: uncer should read under.

On p. 168, line 1: $h(t)$ should read $h(\underline{t})$.

On p. 168, line 4: $\dots \int_{c^*}^{x^*} h(\underline{t})^{1/p} d\lambda(\underline{t})]^p$ should read $\dots \int_{c^*}^{x^*} h(\underline{t})^{1/p} d\lambda(\underline{t})]^p$.

On p. 168, line 9 up: $p>0$ should read $p<0$.

On p. 168, line 12: $\dots \sum_{i=1}^n q_i (1 \leq i \leq n)$ should read $\dots \sum_{i=1}^n q_i (1 \leq i \leq n)$.

On p. 168, line 18: $\dots \int_{y^*}^{y^*} d\lambda(\underline{t})]^p$ should read $\dots \int_{y^*}^{x^*} d\lambda(\underline{t})]^p$.

On p. 168, line 1 up: $\dots Q(\cdot, F) \dots$ should read $\dots Q(\cdot, \phi, F) \dots$.

On p. 169, line 3: $\dots \phi \dots$ should read $\dots \text{or} \dots$.

On p. 169, line 4: $Q(x, \epsilon, F) \neq 0$ should read $Q(x, \phi, F) > 0$.

On p. 169, line 7: Insert the integral sign.

On p. 170, line 7 up: Number the integral by adding (4.4) on the right.

On p. 170, line 6 up: $\sigma_0(x)g(x)^{-r}g'(x)$ should read $\sigma_0(x)=g(x)^{-r}g'(x)$.
