Special Issue on
# Recent Trends in Geometric Function Theory

CALL FOR PAPERS

Geometric function theory is an important branch of complex analysis which deals with the study of geometric properties of analytic functions. Nowadays, the study of the geometric properties of complex functions and their applications is an active area of research. This special issue aims to invite researchers to submit their original research papers as well as review papers that summarize the most recent results and applications in this area. Manuscripts submitted will be considered for publication with the understanding that the same work has not been published and is not under consideration for publication elsewhere.

Potential topics include but are not limited to the following:

- Univalent and multivalent functions
- Conformal and quasiconformal mappings
- Functional equations
- Capacity and harmonic measure
- Potential theory and applications
- Harmonic functions
- Hypergeometric functions

Authors can submit their manuscripts through the Manuscript Tracking System at https://mts.hindawi.com/submit/journals/jca/rtgf/.

Papers are published upon acceptance, regardless of the Special Issue publication date.

**Lead Guest Editor**
Mohamed M. S. Nasser, Qatar University, Doha, Qatar
*mms.nasser@qu.edu.qa*

**Guest Editors**
Ali Murid, Universiti Teknologi Malaysia, Johor Bahru, Malaysia
*alihassan@utm.my*

Piotr Drygas, University of Rzeszow, Rzeszów, Poland
*drygaspi@ur.edu.pl*

Maslina Darus, Universiti Kebangsaan Malaysia, Bangi, Malaysia
*maslina@ukm.edu.my*

**Submission Deadline**
Friday, 24 November 2017

**Publication Date**
April 2018
