

Special Issue on Recent Advances in Nanocarbon Materials

Call for Papers

For more than two decades, nanocarbon materials have provided scientific and technological excitement for scientists working in various disciplines. With their unique structures and novel properties, they have applications in many fields, such as electronics, energy devices, nanocomposites, and biomedical engineering. This special issue will highlight the multidisciplinary and interdisciplinary nature of nanocarbons and aims to provide an updated comprehensive overview of the current status in this fast-developing field. We invite authors from the physical and life sciences (chemists, physicists, material scientists, and biologists) to submit original research and review articles related to the synthesis, and characterization and applications of nanocarbons, from both experimental and theoretical perspectives. Potential topics include, but are not limited to:

- Carbon nanotubes, graphene-related materials, fullerenes, nanodiamonds, and other carbon nanostructures (e.g., nanofibers and nanowalls)
- Synthesis, purification, and separation of nanocarbons
- Characterization of the material and electronic properties of nanocarbons
- Applications and characterization of nanocarbon-based devices

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/jnm/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/jnm/rnm/> according to the following timetable:

Manuscript Due	Friday, 27 June 2014
First Round of Reviews	Friday, 19 September 2014
Publication Date	Friday, 14 November 2014

Lead Guest Editor

Naoki Kishi, Department of Frontier Materials, Nagoya Institute of Technology, Nagoya 466-8555, Japan; kishi.naoki@nitech.ac.jp

Guest Editors

Shota Kuwahara, Department of Applied Chemistry, Chuo University, Tokyo 112-8551, Japan; kuwahara@kc.chuo-u.ac.jp

Keita Kobayashi, Research Center for Ultra-High Voltage Electron Microscopy, Osaka University, Osaka 567-0047, Japan; kobayashi-z@uhvem.osaka-u.ac.jp

Palanisamy Ramesh, Carbon Solutions Inc., 1200 Columbia Avenue, CA 92507, USA; ramesh@carbonsolution.com
