

Special Issue on  
**Nanotechnology in the Field of Wastewater Treatment**

# CALL FOR PAPERS

This special issue publishes original research findings and insights regarding the fundamental principles of low cost and economic materials used in the field of wastewater treatment and technologies.

The journal aims to provide an international forum for the presentation of original fundamental research, reviews, and new developments in the field of wastewater treatment technologies and economic adsorbent materials. Manuscripts which illustrate logical authentic theory and its wide application in the above said field are welcome. The overall focus is on original and rigorous research results which have generic significance. This special issue emphasizes fundamental scientific innovation.

Potential topics include but are not limited to the following:

- ▶ Nanomaterials and nanoparticles as novel adsorbents
- ▶ Application of nanomaterials loaded on activated carbon prepared from biomaterials
- ▶ Application of nanoparticles loaded on activated carbon materials as adsorbents
- ▶ Application of nanocomposites in the field of wastewater treatment
- ▶ Application of nanosilica in the field of wastewater treatment

Authors can submit their manuscripts through the Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/jnt/lcwt/>.

**Lead Guest Editor**

Inderjeet Tyagi, IIT Roorkee, Roorkee,
