

Special Issue on  
**Traditional and Complementary Medicine in Health and Disease**

# CALL FOR PAPERS

Chemical carcinogens and other toxicants have a negative impact on health worldwide. Medicinal plants and natural products derived from these plants are being increasingly recognized as useful complementary treatments for cancer and other health issues induced by a variety of toxins and toxicants.

In this Special Issue we shall highlight recent scientific advances in the use of traditional herbal remedies and natural products for the treatment of diseases along with modern medicine.

Potential topics include but are not limited to the following:

- ▶ Anticancer activities from various herbal medicines
- ▶ Traditional Medicine for the treatment of diseases that may be induced, at least in part, by toxic chemicals, for example, diabetes, cardiovascular disease, asthma, and infertility
- ▶ Current and “omics” methods for assessing the toxicity of herbal medicines
- ▶ Healthy life and protective medicine aspect of antioxidant supplement against oxidative stress formed by toxic or carcinogenic agents, and so on
- ▶ Structural alerts or “toxicophores” that are associated with toxicity

Authors can submit their manuscripts through the Manuscript Tracking System at <https://mts.hindawi.com/submit/journals/jt/mcct/>.

Papers are published upon acceptance, regardless of the Special Issue publication date.
