The caption of Figure 1 in the paper at doi:10.1155/2012/182767 has to be corrected as shown here. Also, [1] should be corrected as follows: J. Tillein, S. Heid, E. Lang, R. Hartmann, and A. Kral, “Development of brainstem-evoked responses in congenital auditory deprivation,” *Neural Plasticity*, vol. 2012, Article ID 182767, 11 Pages, 2012.

FIGURE 1: Examples of E-ABRs recorded from an adult hearing control (a) and an adult CDC (b). Arrows point to E-ABR components at threshold intensity. Current levels are given in dB attenuation (re 3mApp). In general, similar morphology was observed, with some less-well differentiated waves in CDCs. Stimulus artifact (starting at 0 ms) was removed.
