

Supplementary Material

Figure S1. Q-Q plots for the normality tests of all variables used in the study.

Table S2

Summary of the Factor Analysis on Parkinson's Disease Questionnaire 39 Dimensions: Pattern Matrix (N = 245) after Oblique Promax Rotation

PDQ-39 Dimension	Promax Rotated Factor Loadings			h^2
	Component 1	Component 2	Component 3	
Bodily Discomfort	.98	-.17	-.10	.71
Mobility	.80	.12	.03	.80
Activities of Daily Living	.54	.45	-.09	.70
Communication	-.13	.96	.04	.83
Cognitive Impairment	.10	.77	.00	.69
Emotional Well-Being	.45	.07	.46	.71
Stigma	-.26	.18	.89	.73
Social Support	.19	-.20	.79	.67
Eigenvalue	2.27	1.91	1.67	
% Variance Explained	28	24	21	Σ 73
Cronbach's α	.81	.76	.72	

Note. Factor loadings > .45 appear in bold. h^2 = communality. PDQ-39 = Parkinson's Disease Questionnaire 39.

Table S3

Structure Matrix of the Factor Analysis on Parkinson's Disease Questionnaire 39 Dimensions (N = 245) after Oblique Promax Rotation

PDQ-39 Dimension	(Pattern Matrix) * (Correlation Matrix of Factors)		
	Component 1	Component 2	Component 3
Bodily Discomfort	.83	.36	.34
Mobility	.88	.60	.50
Activities of Daily Living	.76	.73	.39
Communication	.46	.91	.40
Cognitive Impairment	.56	.83	.40
Emotional Well-Being	.73	.54	.73
Stigma	.31	.42	.83
Social Support	.48	.26	.80

Note. Factor loadings > .45 appear in bold. PDQ-39 = Parkinson's Disease Questionnaire 39.
