Figure S1. Effects of pioglitazone on the levels of protein FASN, Acox1 and ACC in the liver of KKAY mice.

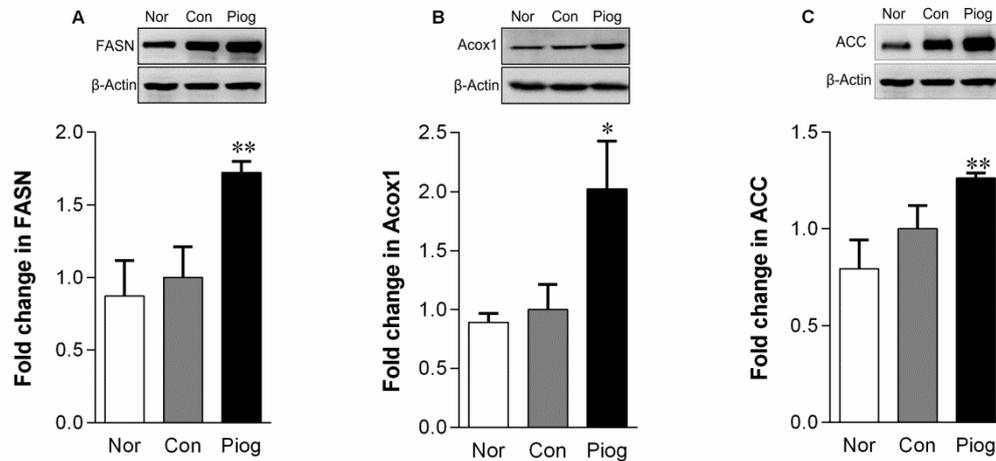

Figure S1. Effects of pioglitazone on the levels of protein FASN, Acox1 and ACC in the liver of KKAY mice. Representative Western blot for FASN (A), Acox1 (B), ACC (C) and β-actin. The bar graph represents statistical data from six individual mice per group. The bands were determined by densitometric analysis and expressed as fold change, after correction for β-actin levels, relative to the control mice. Nor, C57BL/6J mice; Con, vehicle-treated KKAY mice; Piog, pioglitazone-treated KKAY mice. Data are presented as mean ± S.E.M. *P<0.05, **P<0.01 vs. Con.
