BIBLIOGRAPHICAL NOTES.—IV.

BY SAMUEL HENSHAW.

MINOR ENTOMOLOGICAL PUBLICATIONS.—
GARDEN AND FOREST, Vol. I (1888), contains the following notes and articles:

Packard, A. S. The red mite [Tetranychus telarius] on verbenas. p. 20, fig.
Editorial. [Futility of plugging trees with nostrums.] p. 51.
Pearson, A. W. Vineyard notes from southern New Jersey. [Ravages and means against Macroductylus subsinusus.] p. 256–257.

Vol. II (1889) contains the following:

Smith, J. B. The imported elm leaf beetle, Galeruca xanthomelaena Schr. p. 292.
Smith, J. B. The white pine weevil Pis sodes strobi Peck. p. 378, fig.
K., W. and Editor. The asparagus beetle. [Crioceris asparagi.] p. 430.
Williams, E. Trypeta pomonella in New Jersey. p. 527.

MISCELLANEOUS Notes.—Dr. Carl Berg has left Montevideo and returned to Buenos Aires, where he has been given the directorship of the National museum in the place of the late Dr. Burmeister.
Mr. W. L. Distant has again left England for South Africa where his address will be at Pretoria, Transvaal.

The plates in the present number of Psyche illustrate Dr. Holland’s article on West African moths and will be explained at the conclusion of his paper in the next number.
