Review: Modeling damping in mechanical engineering structures

by Michel Lalanne

[*Shock and Vibration* **7**(1) (2000), 29–37]

On page 30, in the section equation, the definition of the Sommerfield number:

$$S = \frac{\mu N L D}{W} \left(\frac{R}{C} \right)$$

should read as

$$S = \frac{\mu N L D}{W} \left(\frac{R}{C} \right)^2$$

(the 2 was missing)
