TheScientificWorldJOURNAL and TSW Urology are delighted to have published the special issue 'Superficial Bladder Cancer', a collection of peer-reviewed papers covering key topics in this important field. The special issue has been organized by Dr. Ziya Kirkali (Genito-Urinary Group, Dokuz Eylul University, Turkey) and investigates the cancer which is the fourth most common seen in men and which accounts for 10% of all cancers seen in developed countries.

Specific topics covered are:

- Superficial bladder cancer in the prostatic urethra
- Optimal treatment for intermediate and highrisk, non muscle invasive bladder cancer.
- Natural History, Recurrence and Progression in Superficial Bladder Cancer
- The Role of the Surgeon & Trans Urethral Resection in the Treatment of Superficial Bladder Cancer
- New strategies in the treatment of Ta-T1 transitional cell carcinoma (TCC) of the bladder
- Best approach for low risk superficial bladder cancer

The Publisher wishes to express thanks to all of the authors and reviewers, and especially to acknowledge the contribution of Dr. Kirkali in bringing about the publication of these papers.
