

Special Issue on Updates in Hemoglobinopathies

Call for Papers

Major advances have been made in the last decade in understanding, diagnosis, and treatment of hemoglobinopathies. Accordingly, a marked improvement in survival of patients with thalassemia major and other types of hemoglobinopathies was observed. This needs to understand and discuss the novel tools to diagnose, prevent late complications, and treat this group of disorders.

We invite investigators to contribute original research articles as well as review articles in this field. Potential topics include, but not limited to:

- Epidemiological comparative studies
- Molecular diagnosis of hemoglobinopathies
- Cardiac, endocrinal, renal, and hepatic complications and updates in their diagnosis and management
- Updates in iron chelation
- Assessment of quality of life
- Stem cell transplantation

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/tswj/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/tswj/hematology/hemo/> according to the following timetable:

Manuscript Due	Friday, 29 March 2013
Final Decision Date	Friday, 26 April 2013
Publication Date	Friday, 07 June 2013
