

## Special Issue on Advances in Perioperative Management

### Call for Papers

The perioperative management has advanced over the years to achieve better outcomes. Several techniques, protocols, and equipment have been developed to ensure patient safety during the perioperative period. The goal of perioperative management is not only to perform a successful surgery, but also to make the whole process very safe and very convenient to the patient, which leads to great patient satisfaction.

We invite investigators to contribute original research articles as well as review articles addressing the advances in perioperative management. Articles can focus on multiple issues related to pain management, anesthetic management in the perioperative period, technology/equipment/monitors used in the perioperative period, patient safety, patient satisfaction, cost effectiveness, and postoperative follow-up. Potential topics include, but are not limited to:

- Topics related to improving patient outcomes
- Advances in anesthetic techniques
- Role of regional anesthesia in both pain control and operative anesthesia
- Advances in airway equipment and techniques
- Perioperative monitoring
- Blood transfusion strategies
- Use of ultrasound and other imaging modalities
- Cost effectiveness, patient safety, and satisfaction
- Updates on the recent advances in perioperative fluid management

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/tswj/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/tswj/anesthesiology/periop/> according to the following timetable:

Manuscript Due	Friday, 16 May 2014
Final Decision Date	Friday, 8 August 2014
Publication Date	Friday, 3 October 2014
