

## Special Issue on Research and Development of Advanced Computing Technologies

### Call for Papers

Advanced computing technologies, including cognitive computing, perceptual computing, neural computing, evolutionary computing, immune computing, granular computing, are one of the hot research fields in artificial intelligence. This special issue aims to promote the research, development, and applications of advanced computing technologies by providing a high-level international forum for researchers and practitioners to exchange research results and share development experiences. Prospective authors are invited to submit high-quality manuscripts written in English. The submission of a paper implies that the paper is original and has not been submitted to elsewhere for possible publication. All submissions will be blindly reviewed by experts in the field based on originality, significance, quality, and clarity. Potential topics include, but are not limited to:

- Cognitive computing
- Perceptual computing
- Neural computing
- Evolutionary computing
- Immune computing
- Social computing
- Network computing
- Cloud computing
- Granular computing

Before submission authors should carefully read over the journal's Author Guidelines, which are located at <http://www.hindawi.com/journals/tswj/guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mts.hindawi.com/submit/journals/tswj/computer.science/reda/> according to the following timetable:

Manuscript Due	Friday, 27 June 2014
Final Decision Date	Friday, 25 July 2014
Publication Date	Friday, 5 September 2014
