CARL L. GARDNER*

Department of Mathematics, Arizona State University, Tempe, AZ 85287-1804

The Second International Workshop on Quantum Kinetic Theory was held August 4–13, 1997 on the campus of Colorado Mountain College in Breckenridge, Colorado. The first Workshop was held in Victoria, British Columbia in August 1995. The Breckenridge Workshop was organized by Paul Zweifel of Virginia Polytechnic Institute and

State University and Carl Gardner of Arizona State University. The small size of the Workshop allowed for extensive discussions and collaborations. This issue of *VLSI Design* represents a cross section of the talks given at the Workshop, which focussed primarily on quantum transport in semiconductor devices.
