

## Recent Publications

Q.Y. Song et al.: Magnetic seeding flocculation of weakly magnetic iron minerals.  
*Intl. J. Min. Proc.* 34 (1992), 219

N.H. Duc et al.: The magnetic behaviour of rare-earth transitional metal compounds.  
*J. Magn. Magn. Mater.* 104 (1992), 1252

A. Wooding et al.: 'Stripped' magnetic particles-applications of double surfactant layer principle in the preparation of water-based magnetic fluids.  
*J. Coll. Interface Sci.* 149 (1992), 98

F.M. Yang et al.: Some research progress in RE-Fe hard magnetic materials in China.  
*J. Magn. Magn. Mater.* 104 (1992), 1102

C. Blache and G. Lemarquand: High magnetic field gradients in flux-confining permanent magnet structures.  
*J. Magn. Magn. Mater.* 104 (1992), 1111

A.D. Dance and R.D. Morrison: Quantifying a black art: the electrostatic separation of mineral sands.  
*Miner. Eng.* 5 (1992), 751

C.W. Notebaart and F.P. van der Meer: Development of a cryogenic canister for the study of selectivity problems in HGMS.  
*Miner. Eng.* 5 (1992), 767

S. Arai et al.: Moving velocity of deposit layers in a continuous HGMS process. (In Japanese).  
*Shigen* 3 (1991), 333

G.S. Beros: Magnetic separation within Renison's sulphide circuit.  
In: 4th Mill Operators Conf., Burnie, Tasmania. March 1991. Proceedings, Australasian IMM Publication Series No. 1/91, p. 174

Z.X. Feng et al.: The design and construction of high field uniformity permanent magnet system for MRI.  
IEEE Trans. Mag. 28, 641 (1992)

P.A. Cheremnykh: Superconductivity in magnetic separation.  
IEEE Trans. Mag. 28, 651 (1992)

J. Gerhold: Straightforward superconducting magnet design for deflection-type separators.  
IEEE Trans. Mag. 28, 655 (1992)

Yu. S. Astakhov et al.: Application of alternating and pulsed magnetic fields for removal of intraocular foreign bodies of non-ferromagnetic metals.  
IEEE Trans. Mag. 28, 659 (1992)

S. Grundorfer et al.: Design study of a superconducting 120"-diameter magnetic matrix separator.  
IEEE Trans. Mag. 28, 663 (1992)

K. R. Alikhanov et al.: HGMF model tests for heat carrier cleaning on Leningrad nuclear power plant.  
IEEE Trans. Mag. 28, 668 (1992)

R.D. Smolkin et al.: New process for placer gold recovery by means of magnetic separation.  
IEEE Trans. Mag. 28, 671 (1992)

V.V. Pereverzev et al.: Magnetic extraction of radioactive contaminations from Chernobyl NPP regions.  
IEEE Trans. Mag. 28, 678 (1992)

J. Gerhold et al.: Distorted two-dimensional multipole fields.  
IEEE Trans. Mag. 28, 916 (1992)

M.G. Abele et al.: Field computation in permanent magnets.  
IEEE Trans. Mag. 28, 931 (1992)

P. Lossius and H.A. Oye: Removing impurities from secondary alumina.  
JCM 43, 41 (1991)

Yu.I. Storozhev et al.: Preparation of underfused material for melting in an arc furnace. Refractories 31, 566 (1991)

F. Cairncross: How Europe's companies reposition to recycle. Harvard Business Rev. March-April 1992, p. 34

T.V. Dendyuk and V.A. Arsent'ev: Combined process for beneficiation of manganese ores (in Russian). Puti Ekonomii Resursov pri Obogashch. Rud Cher. Met. (1990), p. 49

V.I. Burak and V.D. Potapov: Interaction of magnetized particles and flocculation in magnetic separation (in Russian). Puti Ekonomii Resursov pro Obogashch. Rud Cher. Met. (1990), p. 41

A. B. Solodenko and S.P. Rabinovich: Magnetic-gravity separator with permanent magnets for analysis of gold-tin-containing slimes. Nov. Metody, Pribory Oborud. i Ustanovki dlya Tekhnol. Issled. Mineral. Syr'ya (1990), p. 120

A.B. Solodenko: Preliminary beneficiation of ores in a magnetic liquid. Tsvet. Metall. 11, 19 (1991)

V.A. Sentemova and M.N. Mishunina: Dry methods in beneficiation of ilmenite ores. Obogashch. Rud (Leningrad) 11 17 (1991)

T.B. Naifonov et al.: Development of advanced technology for beneficiation of eudialyte ores. Obogashch. Rud (Leningrad) 11, 15 (1991)

E.K. Yakubailik et al.: Increasing the quality and recovery of copper concentrate by magnetic separation. Izv. Vyssh. Uchebn. Zaved., Tsvetn. Metall.11, 122 (1991)

R. Pavlova: Optimization of metallurgical installations and systems with incomplete information. Metallurgiya (Sofia) 451, 8 (1990)
