AGICHEM '97

4th Anglo/German Inorganic Chemistry Meeting

Invitation and Call for Posters

Marburg, Germany

September 14 -17, 1997

General Information

The series of Anglo/German Inorganic Chemistry Meetings (AGICHEM) was inaugurated in 1991 as a joint venture of the Gesellschaft Deutscher Chemiker and the Royal Society of Chemistry. The first meeting at Brighton was chaired by M. Lappert and H. Noth. Subsequent conferences were held at Stuttgart (1993, A. Simon, M. Lappert) and Brighton (1995, J. Nixon, H. Noth). They have established themselves as a highly effective forum for the exchange of new concepts and ideas in inorganic chemistry. This can be traced to manageable size, the absence of parallel sessions and a cordial atmosphere.

Location and Dates

Marburg was formerly one of the great pilgrimage centers of the West, the crowds being drawn by the relics of Elizabeth of Hungary. It is the site of the oldest existing protestant university founded in 1527, a magnificent gothic cathedral and old quarters which are interspersed by twisting and climbing alleys. Marburg is situated 100 km north of Frankfurt am Main and can be reached from there by an hourly train service.

The meeting starts Sunday 14 September 1997 with an evening reception and ends Wednesday 17 September 1997 around noon.

Accommodation

Accommodation will be available in hotels and in student dormitories all at walking distance from the conference site. Further details will be provided in the second circular.

Scope and Programme

AGICHEM '97 is intended to present new developments from all fields of Inorganic Chemistry. Therefore, the following topics will be addressed:

- **Organometallic Chemistry**
- **Bioinorganic/Coordination Chemistry**
- **Main Group Chemistry**
- **Solid State/Structural Chemistry**

The programme will comprise 26 invited lectures and a large presentation of posters. The latter form an indispensable part of the conference and two extended periods will be set aside for viewing and discussion. All posters should be on display during the whole duration of the conference.

The following scientists have agreed to present lectures:

J. Caro, Berlin-Adlershof
U. Diefenbach, Berlin
M. Driess, Heidelberg
R. Dronskowski, Stuttgart
G. Erker, Münster
R. Fischer, Heidelberg
K.-D. Franz, Darmstadt
H. Hillebrecht, Freiburg
B. Lippert, Dortmund
J. J. Schneider, Essen
M. Tacke, Karlsruhe
F. Tuczek, Mainz
M. Westerhausen, Stuttgart

F. Armstrong, Oxford
D. Cole-Hamilton, St. Andrews
N. Connolly Bristol
J. Errington Newcastle
B. Haywood, Salford
T. Kee, Leeds
R. Mulvey, Strathclyde
D. O Hare, Oxford
R. Perutz, York
A. Powell, East Anglia
K. Prassides, Sussex
D. Rankin, Edinburgh

Organizing Committee

Philipps-Universität at Marburg
Ch. Elschenbroich (Chair)
K. Dehnicke
B. Harbrecht
J. Lorberth
J. Sundermeyer

University of Sussex at Brighton
J. F. Nixon (Co-Chair)

Correspondence

Inquiries concerning scientific matters and local organization should be addressed to
Professor Dr. Ch. Elschenbroich
Fachbereich Chemie, Philipps-Universität Marburg, Hans-Meerwein-Straße
D-35032 Marburg, Germany
Phone: + 49 69 6421 28 55 27, 5687, Fax: + 49 69 6421 28 89 17
E-mail: EB@ps1515.chemie.uni-marburg.de

Replies to the second circular and final registrations should be directed to
Gesellschaft Deutscher Chemiker, Abt. Tagungen
Postfach 90 04 40, D-60444 Frankfurt am Main, Germany
Phone: + 49 69 7917 358 /-360 /-366, Fax: + 49 69 7917 475
E-mail: tg@gdch.de
GDCh-Homepage: <http://www.gdch.de>

Anybody interested in receiving the second circular, in attending the conference and in presenting a poster is asked to contact

Prof. Dr. Ch. Elschenbroich
Fachbereich Chemie, Philipps-Universität Marburg
Hans-Meerwein-Straße, D-35032 Marburg, Germany
