Table S1:

Colors are used to help identify groups of consistency and responders to treatment. PeLNP= Peripheral Localised Neuropathic Pain. WST=Warm Sensation Threshold. HPT=Heat Pain Threshold. CP8%=8% Capsaicin patch.

Table S2:

Colors are used to help identify groups of consistency and responders to treatment. PeLNP= Peripheral Localised Neuropathic Pain. WST=Warm Sensation Threshold. HPT=Heat Pain Threshold. CP8%=8% Capsaicin patch.

Table S3:

Colors are used to help identify groups of consistency and responders to treatment. PeLNP= Peripheral Localised Neuropathic Pain. WST=Warm Sensation Threshold. HPT=Heat Pain Threshold. CP8%=8% Capsaicin patch.

Table S4. Concomitant medication. In this table we can see how the subjects that make up the study are treated with one or more drugs.
