

Reply to the files requested(18th April)

I am very glad to receive your email. The replies are as follows:

1. Title

The correct title of this manuscript is "Instability analysis of a low-angle low expansive clay slope under seasonal wet-dry cycles and river level variations".

2. Authors & Affiliations

When the research group discussed and submitted the revised manuscript, the author Yufeng Gao suggested to remove his name and add Zongzhi Wang as the co-corresponding author according to the author Wang's contributions to this research. Therefore, the author Yufeng Gao was missing from the main manuscript PDF file.

3. Please upload editable figure files and tables separately

The editable figure files will be uploaded. May you please see the attached files. The editable tables are in the editable version of the main manuscript (Doc format).

4. Please upload the main manuscript file in an editable format

The main manuscript file in an editable format (Doc format) will be uploaded. May you please see the attached files.

Thanks.
