In the article titled “The Impact of Tropical Cyclones in Premonsoonal Season on Local Convection over the Al-Hajar Mountains in Oman during 2007–2018” [1], there is an error in Section 3.3, where “as deep depression with maximum sustained wind speed of about 28–33 knots” should be corrected to “as tropical cyclone of category 1 with maximum sustained wind speed of about 70–80 knots.”
