

## Tables

Suppl. Tbl. shows mean OCT GLD's at all 4 time points examined for different lesion stratifications. The same data are displayed graphically in Fig. 5. 0-values were excluded from the evaluation.

\* In these groups, irradiation diameters were unevenly distributed, which leads to a bias.

| Stratification criterion | 1 hour<br>OCT GLD<br>[μm] | 1 month<br>OCT GLD<br>[μm] | 3 months<br>OCT GLD<br>[μm] | 6 months<br>OCT GLD<br>[μm] |
|--------------------------|---------------------------|----------------------------|-----------------------------|-----------------------------|
|                          |                           |                            |                             |                             |
| Diameter 100 μm          | 243                       | 196                        | 178                         | 193                         |
| Diameter 300 μm          | 404                       | 307                        | 303                         | 307                         |
|                          |                           |                            |                             |                             |
