| Wittert et al. 1991 [52] | 15 min | RCD | Athletes ${ }^{\text {b }}$ | $20 \% \mathrm{VO}_{2}$ max | Treadmill walking | 15 min single bout | No data | 100\% | No data |
| Perini et al. 1989 [48] | 5 min | RCD | Sedentary (sedentary not defined) | $\begin{aligned} & 15-33 \% \mathrm{VO}_{2} \\ & \max (21.5 \% \pm \\ & 2.8 \%) \end{aligned}$ | Stationary cycling | 5 min single bout | Ergometer | 100\% | No data |

Abbreviations: d, day; ECG, electrocardiogram; HR, heart rate; hr, hour; HRR, heart rate reserve; max, maximum; METs, metabolic equivalents; min, minute; mo, month; NRCT, non-randomized controlled trial; RCD, randomized cross-over design; RCT , randomized controlled trial; URCT, uncontrolled randomized clinical trial; $\mathrm{VO}_{2}$ max, maximal oxygen consumption; $\mathrm{VO}_{2}$ peak, peak rate of oxygen consumption; $\mathrm{VO}_{2} \mathrm{R}$, oxygen consumption reserve; VT, ventilatory threshold; wk, week. ${ }^{\text {a }}$ Described using the terminology of the primary study. ${ }^{b}$ Level of activity not clearly described in the study. Compliance refers to the number of activity sessions completed by the participants (expressed in \%).
