Abbreviation: AC Adenocarcinoma, MC Mucinous adenocarcinoma, SRCC Signet ring cell carcinoma

† other=American Indian/AK Native, Asian/Pacific Islander, according to SEER

‡ grade I = well differentiated; grade II = moderately differentiated; grade III = poorly differentiated; grade IV = undifferentiated; anaplastic

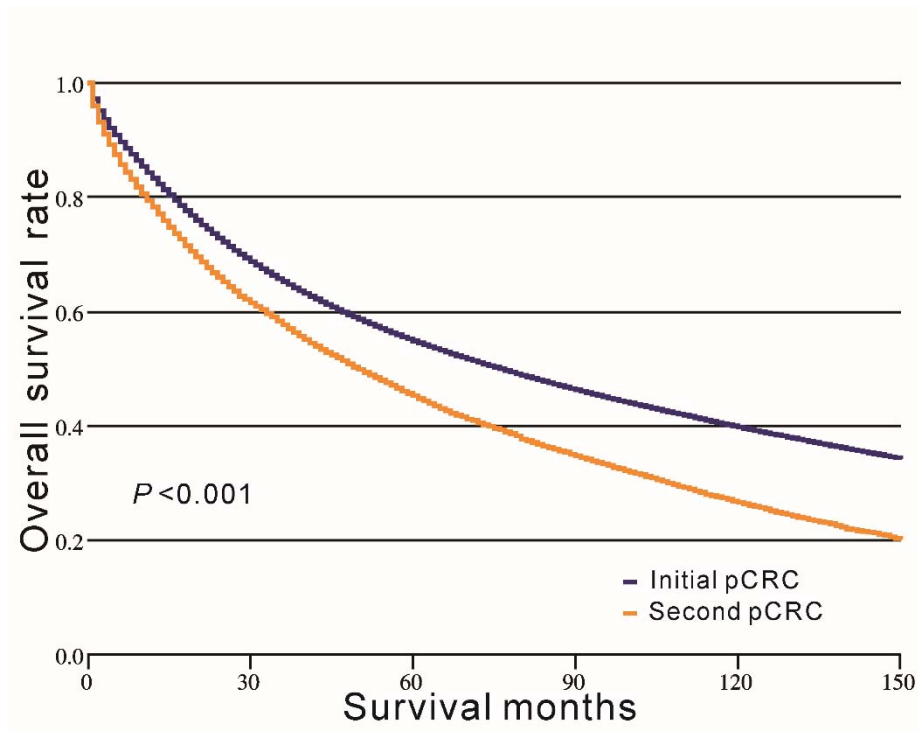

Figure 1 Kaplan-Meier comparison of overall survival among patients with initial pCRC and second pCRC.

Figure 2 Kaplan-Meier comparison of overall survival among patients with initial pCRC and second pCRC stratified by primary site.

(A) Patients with right-sided colon cancer (initial pCRC vs. second pCRC); (B) Patients with left-sided colon cancer (initial pCRC vs. second pCRC); (C) Patients with rectum cancer (initial pCRC vs. second pCRC).

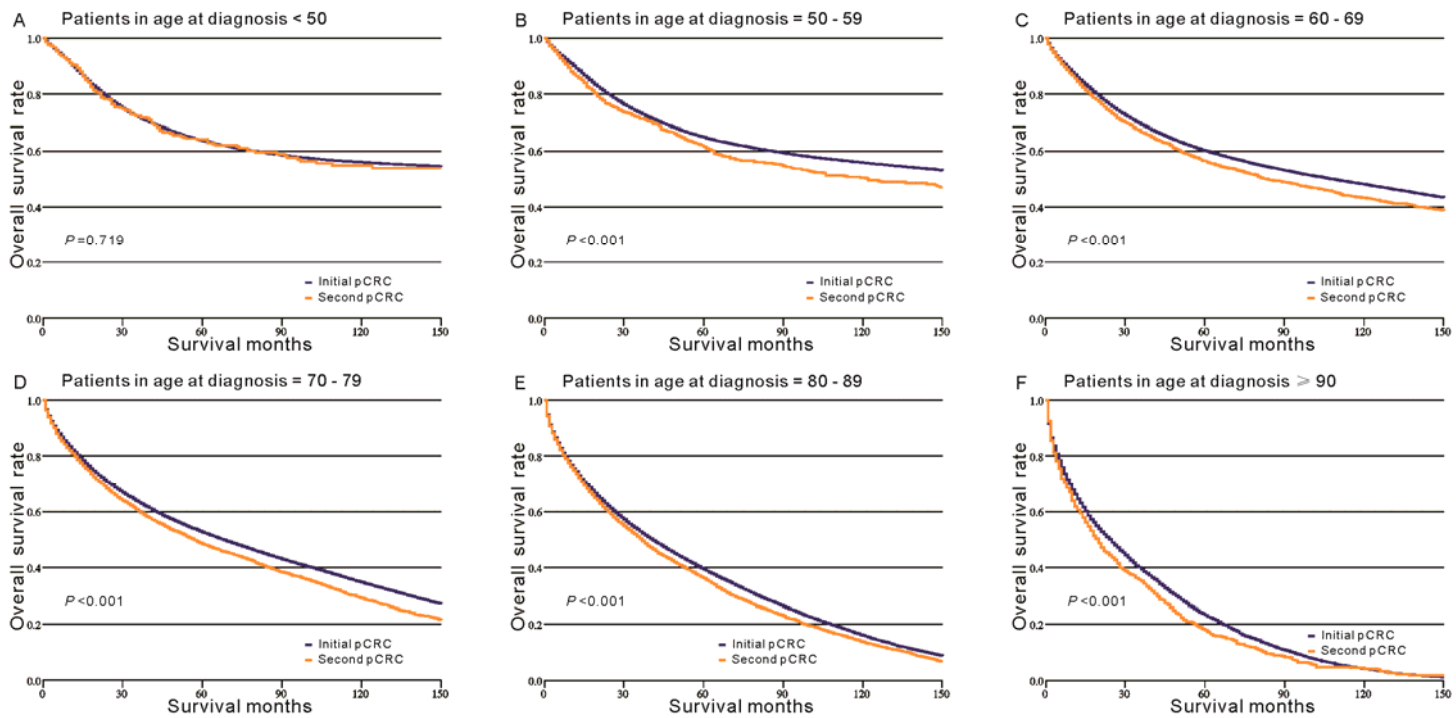

Figure 3 Kaplan-Meier comparison of overall survival among patients with initial pCRC and second pCRC stratified by age at diagnosis.

(A) Patients in age at diagnosis > 50 (initial pCRC vs. second pCRC); (B) Patients in age at diagnosis = 50 - 59 (initial pCRC vs. second pCRC); (C) Patients in age at diagnosis = 60 - 69 (initial pCRC vs. second pCRC); (D) Patients in age at diagnosis = 70 - 79 (initial pCRC vs. second pCRC); (E) Patients in age at diagnosis = 80 - 89 (initial pCRC vs. second pCRC); (F) Patients in age at diagnosis ≥ 90 (initial pCRC vs. second pCRC).

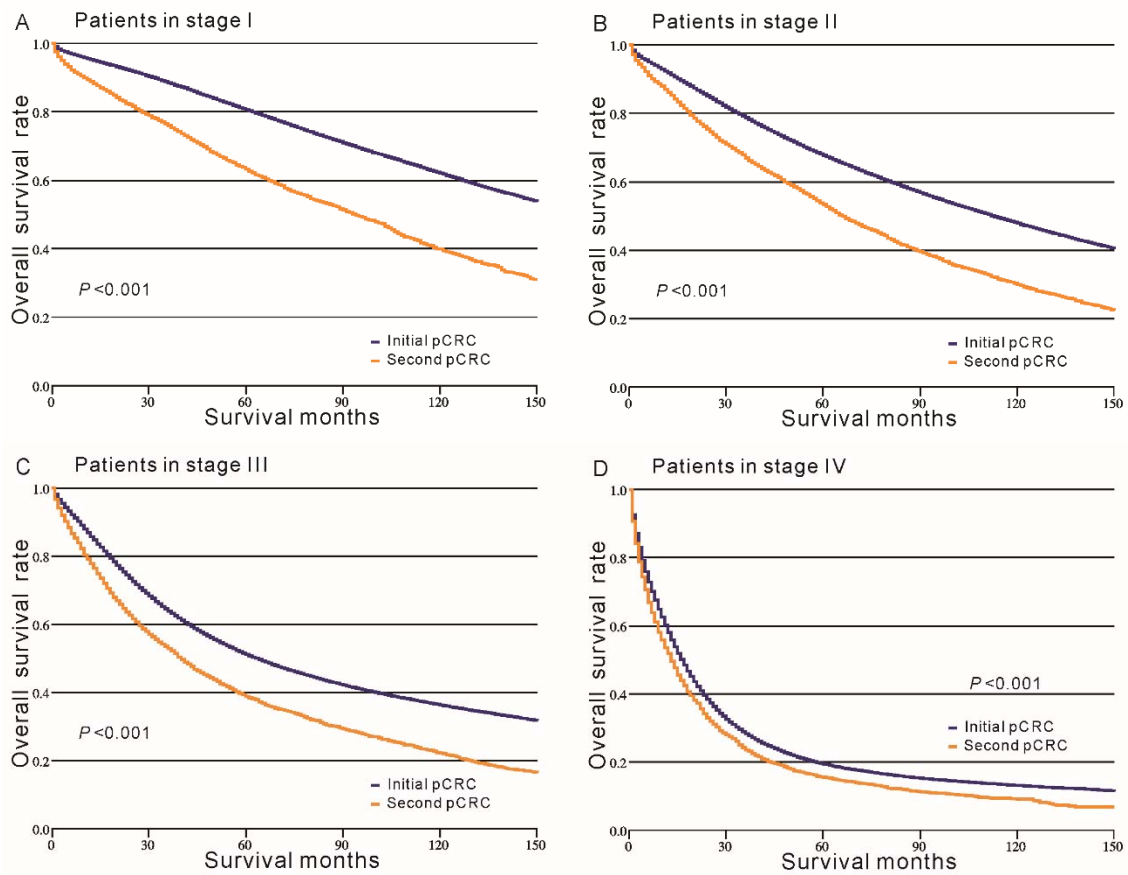

Figure 4 Kaplan-Meier comparison of overall survival among patients with initial pCRC and second pCRC stratified by pTNM stage.

(A) Patients in stage I (initial pCRC vs. second pCRC); (B) Patients in stage II (initial pCRC vs. second pCRC); (C) Patients in stage III (initial pCRC vs. second pCRC); (D) Patients in stage IV (initial pCRC vs. second pCRC).

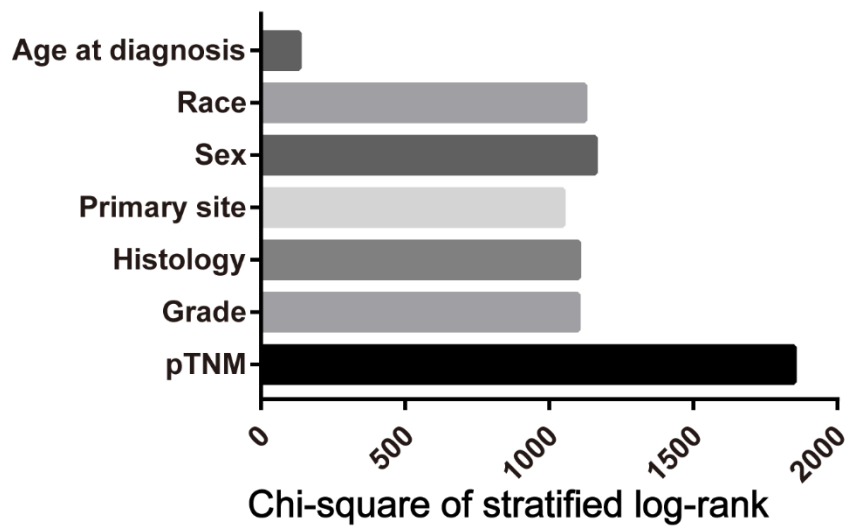

Figure 5 Chi-square of OS log rank after stratified by pTNM stage, grade, histology, primary site, sex, race and age at diagnosis. The Chi-square for Age at diagnosis was lowest.

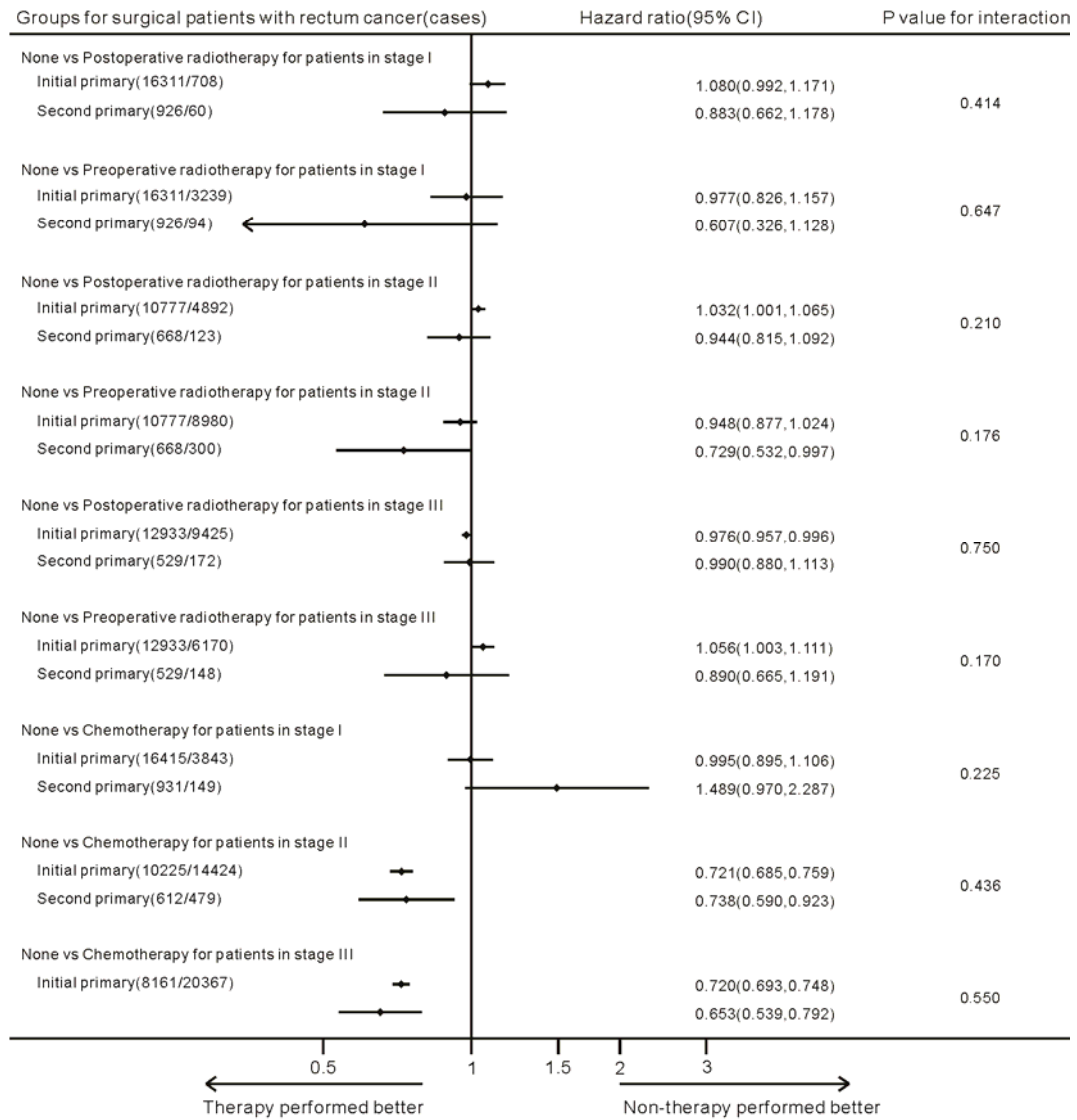

Figure 6 Forest plot of Hazard ratios (HR) and 95% CI in OS different subgroups (Cox proportional hazards model analysis) and interaction comparison between patients with initial and second primary surgical rectum cancer.

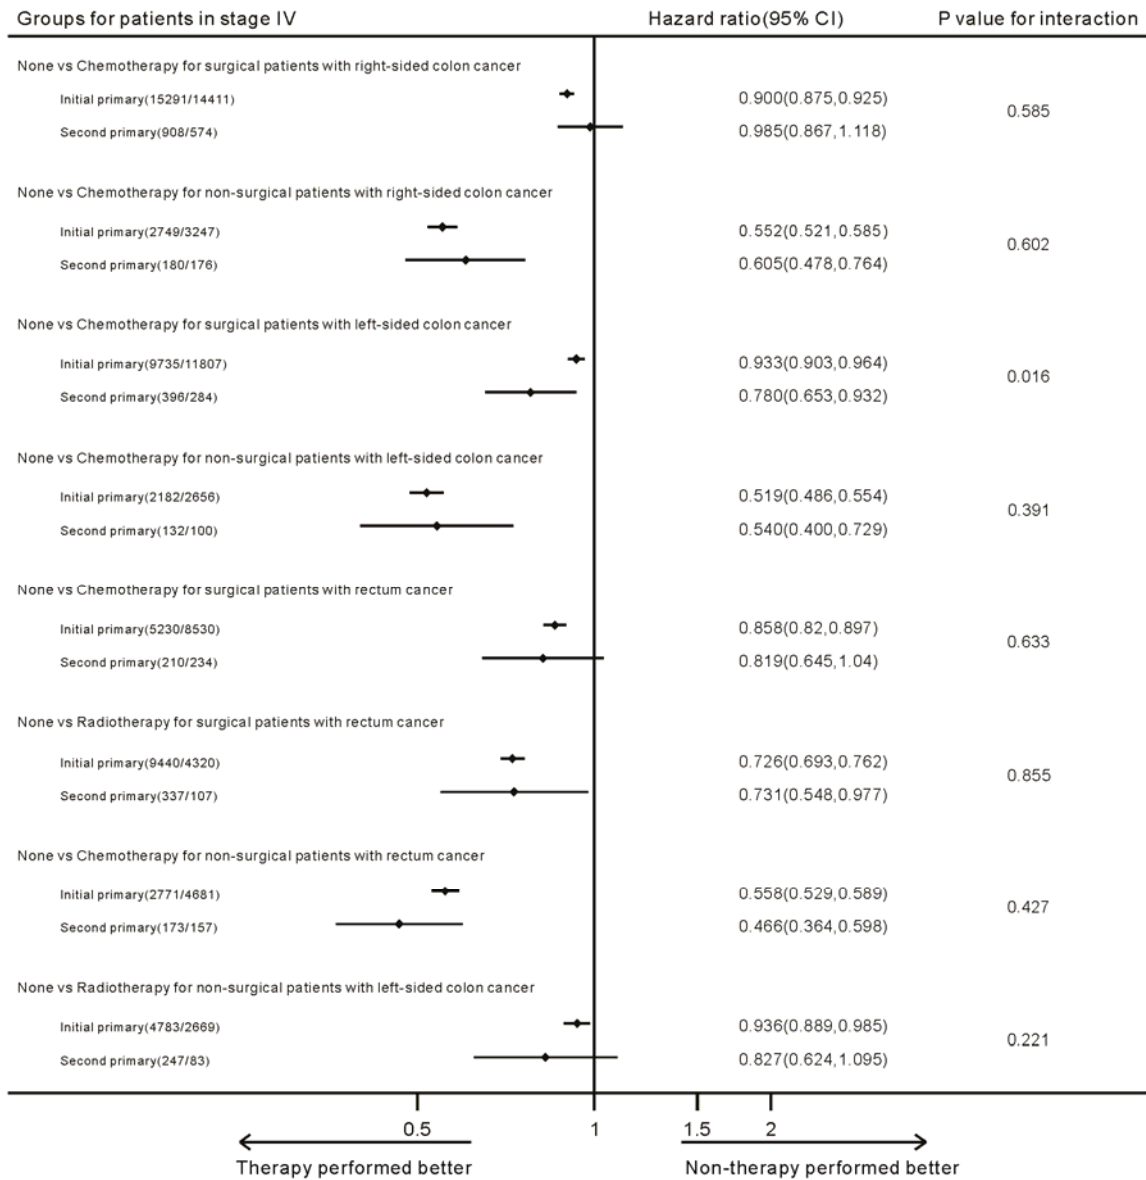

Figure 7 Forest plot of Hazard ratios (HR) and 95% CI in OS different subgroups (Cox proportional hazards model analysis) and interaction comparison between patients in stage IV with initial and second primary CRC.

Figure 8 Forest plot of Hazard ratios (HR) and 95% CI in OS different subgroups (Cox proportional hazards model analysis) and interaction comparison between patients with initial and second primary surgical colon cancer.
