In the article titled “The Effect of Cochlear Size on Cochlear Implantation Outcomes” [1], there was an error in Table 3, where the results following “Outer wall length to 360 degrees” and “Outer wall length to 720 degrees” were inverted. There was also a typo “A-vau” which should have read “A-value”. The corrected table is shown below and is listed as Table 1.

TABLE 1: Cochlear metrics for all subjects. There is no statistically significant difference in all measurements between subjects receiving either electrode.

		Minimum (mm)	Maximum (mm)	Mean (mm)	Standard deviation (mm)
A-value	Flex 31	8.1	9.8	8.94	1.63
	Flex 28	8.1	9.5	8.87	0.38
	Combined			8.91	0.37
Outer wall length to 720 degrees	Flex 31	29.8	35.9	32.52	1.41
	Flex 28	27.8	34.7	31.91	1.63
	Combined			32.29	1.51
Outer wall length to 360 degrees	Flex 31	19.6	23.5	21.4	0.94
	Flex 28	18.3	22.6	21.1	1.09
	Combined			21.3	1
