In the article titled “Assessment of School Readiness in Chronic Cholestatic Liver Disease: A Pilot Study Examining Children with and without Liver Transplantation” [1] there was an error in the Abstract, where the statement “Median Full-Scale IQ was 98 (range 102–116) for LT and 116 [(range 90–106), $p = 0.35$, NS] for NL subjects” should be corrected to “Median Full-Scale IQ was 98 (range 90–106) for LT and 116 [(range 102–116), $p = 0.35$, NS] for NL subjects.”
