

Table 2S: Result of univariable linear regression analysis with CAP as an outcome and fasting hours as predictors using a spline term at 10 hours				
	Estimate	Std. Error	t value	Pr(> t)
(Intercept)	253.59	4.224	60.037	<0.01
Fasting	1.033	0.5162	2.002	0.0684
Fasting spline	-3.810	1.6797	-2.27	0.043 *
Fasting: fasting spline	0.0758	0.049	1.56	0.145
