In the article titled “Oral Adverse Reactions Caused by Over-the-Counter Oral Agents” [1], there is a mismatch between the text and the cited references [8] and [9] that should be corrected as follows:

Reference [8] should be replaced with the following reference: Moghadam BKH, Drisko CL, Gier RE. “Chlorhexidine mouthwash-induced fixed drug eruption: case report and review of the literature.” *Oral Surg Oral Med Oral Pathol* 1991; 71:431-4 [2].

Reference [9] should be replaced with the following reference, which was previously added as reference [8]: B. K. H. Moghadam, R. Gier, and T. Thurlow, “Extensive oral mucosal ulcerations caused by misuse of a commercial mouthwash,” *Cutis*, vol. 64, no. 2, pp. 131–134, 1999 [3].

Accordingly, the following statement in Discussion citing reference [9] should be changed from “Kuttan et al. [9] reported a case of severe mucosal injuries following misuse of an undiluted over-the-counter mouthwash with a high alcohol content (70%), oil of peppermint, and arnica.” to “Moghadam et al. [9] reported a case of severe mucosal injuries following misuse of an undiluted over-the-counter mouthwash with a high alcohol content (70%), oil of peppermint, and arnica.”
