

Author (Reference)	Gender/age	Clinic	Imaging/Findings	Biopsy/ Results	Treatment
8	M/28 yrs	Headache Seizure Hemiplegia	CA/vasculitis typical changes	No	Steroid
	F/16 yrs	Fever Dysphagia Seizure	MRI/Thalamus infarct	No	Steroid
	F/38 yrs	Dysarthria Ataxia Quadriparesis	CA/negativ	Yes/ confirming vasculitis	Steroid
9	F/20 yrs	Headache Vomiting Diplopia Upper Motor Symptoms	MRI/Supra- inratentorial lesions	Yes/ confirming vasculitis	Steroid Cyclophosphamide Azathioprin
10	M/54 yrs	Hemiparesis Headache Aphasia	MRI-A/vasculitis typical changes	Yes/ confirming vasculitis	Steroid Cyclophosphamide
	W/55 yrs	Hemiparesis Aphasia Stupor	CA/Vasculitis appearing changes	Yes/ confirming vasculitis	Steroid
	M/35 yrs	Hemiparesis Language disorder	MRI/hyperintense lesions in frontal lobe, paraventricular area	Yes/ confirming vasculitis	Steroid Cyclophosphamide
11	M/42 yrs	Stereotypic tingling spells in right hand	Gradient echo MRI/multiple petechial hemorrhages	Yes/ confirming vasculitis	Steroid Cyclophosphamide
12	F/ 70 yrs	Confusion Disorientation Memory loss	CT/areas of cerebral edema	Autopsy confirmed vasculitis	Steroid

Table 1: Literature findings

Legend: M: Male; F: Female; CA: Cerebral angiography; MRI-A: MRI-Angiography; yrs: years
