Evidence-Based Complementary and Alternative Medicine has retracted the article titled “Herbal Supplement Ameliorates Cardiac Hypertrophy in Rats with CCl<sub>4</sub>-Induced Liver Cirrhosis” [1]. The article was found to contain duplicated images in Figure 4(a), in which the IL6 blots are identical to the p-ERK5 blots. The authors provided a corrected figure, with replacements for p-ERK5, which is available as Supplementary Materials. However, they could not provide the underlying blots.
