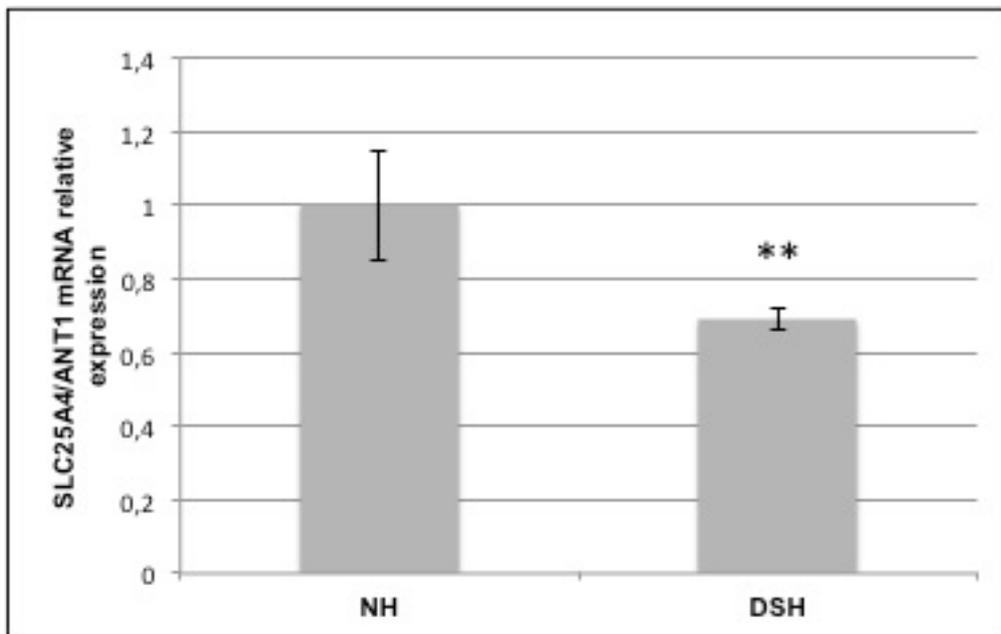

Figure 1. SLC25A4/ANT1 expression in heart tissue by qRT-PCR.

Real-time PCR of SLC25A4/ANT1 in trisomic hearts confirmed the downregulation obtained by microarray analysis. Results are expressed as relative mean values \pm SEM of 3 trisomic samples (DSH), compared with control hearts (NH) set equal to 1.

** p < 0.01. P-value expresses statistical significance for trisomic versus non trisomic sample comparisons.
