54 enrolled (referred for MBS study)
27 swallowing dysfunction (-)
(5 term, 9 late preterm, 13 early preterm)
27 swallowing dysfunction (+)
(4 term, 4 late preterm, 19 early preterm)
4 term
4 late preterm
19 early preterm
Symptom improved
Symptom persistent
2 thickened formula
(1 pulmonary sequestration,
1 skeletal dysplasia)
3 thickened formula
3 continued oral feeding with
standard formula
11 thickened formula
2 tube feeding
1 tube feeding
5 tube feeding
Follow up MBS study
2 persistent aspiration
(cerebral palsy)
1 improved
4 improved
1 persistent aspiration
(cerebral palsy)
