In the article titled “How Households Adopt Sustainable Innovations? A Free Decision Enforced by Others” [1], there were errors in Figure 5. The confidence intervals of

technical interest were missing and there was an error in the description of the figure. The corrected figure along with the description is shown below.

FIGURE 5: Descriptive data (means and standard deviations) of the independent variables and scales measured within the studies. Most items were measured on a 5-point Likert scale. In studies I and II, investment-relevant knowledge was measured on a 6-point Likert scale. The items were standardized for further analyses.
